# Section 7. Handling and storage

# Precautions for safe handling

Wear gloves/protective clothing/eye protection/face protection.

Before handling, it is very important that engineering controls are operating, and that protective equipment requirements and personal hygiene measures are being followed. People working with this chemical should be properly trained regarding its hazards and its safe use. Inspect containers for leaks before handling. Label containers appropriately. Ensure proper ventilation. Avoid breathing dust/fume/gas/mist/vapours/spray. Avoid contact with eyes, skin and clothing. Keep away from heat, sparks and flame. Avoid generating high concentrations of dusts, vapours or mists. Keep away from incompatible materials (Section 10). Keep containers closed when not in use. Empty containers are always dangerous. Refer also to Section 8.

### Conditions for safe storage, including any incompatibilities

Store in a well-ventilated place. Keep container tightly closed. Keep cool. Store locked up. Store away from incompatible materials (Section 10). Inspect all incoming containers to make sure they are properly labelled and not damaged. Storage area should be clearly identified, clear of obstruction and accessible only to trained personnel. Inspect periodically for damage or leaks.

### Section 8. Exposure controls/Personal protection Control parameters (biological limit values or exposure limit values and source of those values)

Exposure limits: Dust - PEL-TWA 15 mg/m<sup>3</sup> (total dust) & 5 mg/m<sup>3</sup> (respirable fraction); CAS 14808-60-7 ACGIH – TLV-TWA 0.025 mg/m<sup>3</sup> (respirable particles) & PEL-TWA 10 mg/m<sup>3</sup> (respirable particles) & 30 mg/m<sup>3</sup> (total dust);

#### Appropriate engineering controls

Use under well-ventilated conditions. Local exhaust ventilation system is recommended to maintain concentrations of contaminants below exposure limits. Make emergency eyewash stations, safety/quick-drench showers, and washing facilities available in work area.

#### Individual protection measures/personal protective equipment

Respiratory protection is required if the concentrations are higher than the exposure limits. Use a NIOSH approved respirators if the exposure limits are unknown. Chemically protective gloves (impervious), and other protective clothing to prevent prolonged or repeated skin contact, must be worn during all handling operations. Wear protective chemical splash goggles to prevent mists from entering the eyes. Wash hands/nails/face thoroughly after handling. Do not eat, drink or smoke when using this product. Practice good personal hygiene after using this material. Remove and wash contaminated work clothing before re-use.

Section 9. Physical and chemical properties				
Appearance, physical state/colour Gray-brown solid	Vapour pressure Not available			
Odour Odourless	Vapour density Not available			
Odour threshold Not available	Relative density Not available			
pH Not available	Solubility Insoluble			
Melting/freezing point Not available	Partition coefficient - n-octanol/water Not available			
Initial boiling point/range Not available	Auto-ignition temperature Not available			
Flash point Not available	Decomposition temperature Not available			
Evaporation rate Not available	Viscosity Not available			
Flammability (solids and gases) Not available	VOC Not available			
Upper and lower flammability/explosive limits Not available	Other None known			
Section 10. Stability and reactivity				
Reactivity				
Does not react under the recommended storage and handling conditions prescribed.				
Chemical stability				
Stable under the recommended storage and handling conditions prescribed.				
Possibility of hazardous reactions				
None				
Conditions to avoid (static discharge, shock or vibration)				
None				
Incompatible materials				
None				
Hazardous decomposition products				
None known				
Section 11. Toxicological information				
Information on the likely routes of exposure (inhalation, ingestion, skin and eye contact)				
May cause cancer. Causes damage to organs (lungs) through prolonged or repeated exposure (inhalation).				
Symptoms related to the physical, chemical and toxicological characteristics				
Eye irritation, redness, tearing;				
Delayed and immediate effects (chronic effects from short-term and long-term exposure)				
Skin Sensitization – No data available; Respiratory Sensitization – No data available; Germ Cell Mutagenicity – No data available; Carcinogenicity				
- Ingredient listed according to IARC, ACGIH, NTP or OSHA; Reproductive Toxicity - No data available; Specific Target Organ Toxicity -				
	- Repeated Exposure - Possible; Aspiration Hazard - No data available;			
Health Hazards Not Otherwise Classified – No data available.				
Numerical measures of toxicity (ATE; LD50 & LC50)				
CAS 7647-14-5 LD <sub>50</sub> Oral - Rat - 3000 mg/kg;				
ATE not available in this document.				

	Section 12. Ecological information				
Ecotoxicity (aquatic and terrestrial information)					
No data available for this product.					
Persistence and degradability No data available					
Bioaccumulativ	Bioaccumulative potential No data available				
Mobility in soil					
Other adverse e					
	Section 13. Disposal considerations				
Information on	safe handling for disposal/methods of disposal/contaminated packaging				
Dispose of contents/container into safe container in accordance with local, regional or national regulations.					
Section 14. Transport information					
UN					
UN number; Proper shipping name; Class(es); Packing group (PG) of the TDG/49 CFR Regulations					
NOT REGULATED					
UN number; Proper shipping name; Class(es); Packing group (PG) of the IMDG (maritime)					
NOT REGULATED					
UN number; Proper shipping name; Class(es); Packing group (PG) of the IATA (air)					
NOT REGULATED					
Special precautions (transport/conveyance) None					
Environmental hazards (IMDG or other) None					
Bulk transport	(usually more than 450 L in capacity) Possible				
	Section 15. Regulatory information				
Safety/health C	anadian regulations specifics Refer to Section 2 for the appropriate classification. This product has been classified in				
·····	accordance with the hazard criteria of the Hazardous Products Regulations (HPR).				
Environmental	Canadian regulations specifics Ingredient(s) of the DSL				
	ivironmental outside regulations specifics None
